Several days later when I woke up at the hospital, I realized I had to spend the rest of my life 37 arms. How sad I felt at that time! 38 slowly I knew I had to face the fact and got over it. I couldn't get my arms back even though I 39 every day.

However, it's easier 40 than done. It took me nearly half a year to get out of the sadness completely. I got so much from my past story. From then on, I could treat my life with a normal mind. But in our daily life, I often

see my classmates get 41 about little things: They get a bad grade on a test; they don't have a mobile phone but 42 have, and so on. But I just 43 life. I am lucky to realize from an accident; it is a waste of our life to focus on (集中于) what you have lost. We should always think of what we have. So why are so many people unhappy? Someone may say, "My whole life would be better 44 I have a new car." But when you get the car and what 45? For a whole week, you are walking on air. Then you go right back to being unhappy.

Happiness depends on what we have! It is in your heart. It's a state of mind. Even though you own the whole world, you may still feel unhappy. Happiness comes from mastering the art of appreciating and taking pleasure in what you really have.

Mr. Guo is a teacher from Xi'an. He asked his students to hand in their homework through a QR code(二维码). "We spent an hour or two in class learning how to create the codes, and in the end everything gets easier," said Guo, "When students finish the homework, they keep it in WeChat. Then, each student makes his own QR code and gives it to me. So I can check their work anywhere using my computer or telephone."

The QR codes can be sent to Mr. Guo by email, QQ and WeChat. When Guo scans(扫描) his students' QR codes, their homework appears on his phone. He finds that their homework becomes more creative, with many

pictures, music and even videos.

Guo's students like the new way and think it is interesting. "We are living in the information age. Many students like to work with computers, which makes learning more fun." said Tingling, a student of Guo's. "The paper is not easy to keep, but the code is easy to keep and share." Guo said.

However, some parents are worried. They are afraid that their children will spend too much time on computers. But in fact, it is unnecessary. Students only use the codes when they hand in their work, which doesn't take them too much time. Also for teachers, it allows them to check the student's work anywhere at anytime. And it is also an easy way to share homework with other students.
