Almost all children go to school. Some children spend most of their time at school. Others spend only hours there.

Schools are different in different parts of the world. But they are all the same in one way. Schools are where children go to learn.

School buildings can be large or small. They can be made from many different materials(材料). Some children even go to school outside or in buildings with no walls.

Basketball is a fun and fast sport. People play basketball with an orange ball and a hoop(篮 圈). Long ago, a teacher wanted a sport for his students. The winters were too cold to play outside. The teacher put a peach basket on the wall and a new game---basketball was born.

Today, students in schools everywhere have fun playing basketball. All they need is a basket and a ball.

There are thousands of basketball teams in cities and schools in the USA. Other countries also have basketball teams.

In a basketball game, there arc two teams, Teams score (得) points (分数) by throwing(投) the ball through the other teams' hoop. The team that ends the game with the most points wins.

There are many great basketball players. Some people think Michael Jordan is the best of all

time. He played basketball for 16 years and scored thousands of points. Brittney Griner is a great

player, too. She scored 28 points in one game.

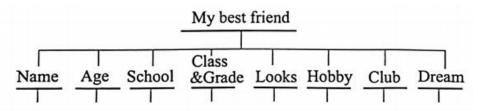

80. How many teams are there in the USA?

81. How can teams score points in a basketball game?

82. Do you want to learn how to play basketball? Why or why not?
